A By-law to enable the Stave Lake Power Company, Limited, to sell Electric Current within the Corporate Limits of New Westminster.

WHEREAS the Stave Lake Power Company, Limited, a body corporate, is desirous of entering into the City of New Westminster for the purpose of supplying electric power for industrial purposes and other purposes incidental thereto, and it is expedient that such permission be granted the said Company upon the terms and conditions hereinafter set out:—

Therefore the Municipal Council of the Corporation of the City of New Westminster enacts as follows:—

(1.) In this By-law the word "Company" shall mean the Stave Lake Power Company, Limited, its successors and assigns, the word "Corporation" shall mean the Corporation of the City of New Westminster, and the word "Council" shall mean the Council of the said Corporation.

(2.) The said Company may construct, erect, and maintain and there is hereby granted to the said Company, under and subject to the terms, conditions and covenants hereinafter set forth, permission to construct, erect and maintain its poles, and string and operate a line or lines of wire along the sides and across or under any public highway, street or bridge within the limits of the City of New Westminster, and to do all things which may be necessary in the supplying of electrical current for industrial power and heating purposes during the term of fifty years from the date hereof.

(3.) This By-law shall not grant unto the Company the right or privilege of supplying power for or operating an electric lighting business within the corporate limits during the said period of fifty years, but any person, firm or corporation who is a customer of the Company, and is using for purposes other than the production of light and heat, power supplied by the Company to the extent of at least thirty (30) horse power, may use power supplied by the Company for the purpose of generating light for the lighting of the business premises of such person, firm or corporation upon which the power supplied by the Company for power purposes as aforesaid is used.

(4.) The Company may, during the said period of fifty years, use such poles upon the public streets as may from time to time be erected or owned by the Corporation for the purpose of carrying the Company's wire or wires under the terms and conditions, that is to say:

(a.) The Corporation may, without any charge, cost or liability, but subject to such reasonable and proper conditions as to position of wires and supervision of work as the Company may impose, use any pole or poles, the property of the Company, and erected by it within the corporate limits for the purpose of carrying any wire or wires belonging to the said Corporation for its own purposes only:

(b.) Before placing any wire or wires upon any pole or poles belonging to the Corporation the Company shall obtain the consent, in writing, of the Mayor, Chairman of the Board of Works, and Chairman of the Light Committee of the said Council for the time being, and it shall be lawful for the said Mayor, Chairman of the Board of Works, and Chairman of the Light Committee of the Council aforesaid, in granting such consent to impose such reasonable and proper conditions as to position of wires and supervision of work as it may deem fit:

(c.) The Company shall pay to the Corporation:—

(1.) In each and every calendar year up to and including the year 1913 for each and every pole erected, maintained, or used by the Company, other than poles belonging to the Corporation, ten (10) cents per pole per annum, and for each and every pole belonging to the Corporation, used by the Company for the carrying of any wire or wires, five (5) cents per pole per annum:

(2.) In each and every calendar year from the year 1914 to the year 1923, both inclusive, for each and every pole erected, maintained, kept or used by the Company other than poles belonging to the Corporation, twenty-five (25) cents per pole per annum, and for each and every pole belonging to the Corporation used by the Company for the carrying of any wire or wires, twelve and one-half (12½) cents per pole per annum:

(3.) In each and every calendar year from and including the year 1924 to the end of the full term of fifty years, as herein provided, for each and every pole erected, maintained, kept or used by the Company, other than poles belonging to the Corporation, fifty cents (50) per pole per annum, and for each and every pole belonging to the Corporation used by the Company for the carrying of any wire or wires twenty-five (25) cents per pole per annum; and the above payments shall be made by the Company during the month of December in each year upon the poles actually erected, kept, maintained or used by the Company on the first day of October in such year.

(5.) The permission hereby granted by the Corporation to the Company to construct, erect and maintain poles and conduits, and string and operate wires and cables along the sides and across or under any public highway or bridge within the limits of the Corporation shall be subject to the following conditions, viz.:—

(a.) The line poles shall not be less than 35 feet in height above the surface of the ground or eight inches in diameter at the top where the arm is affixed to the pole, and shall be clean, straight, dressed and painted and set firmly in the ground to the satisfaction of the Foreman of the Board of Works, for the time being, of the said Corporation:

(b.) The said Company shall and will from time to time, and at all times during the erection of any poles, the laying or stringing of any wires, and during repairs to and alterations of the same, take due care and proper precaution for the safety and protection of foot and other passengers, and of horses and carriages passing along the streets, lanes, bridges or highways of the Corporation on which the erection, laying, stringing, construction, alteration or repair is being performed, and will not unnecessarily interfere with

or impede the public right of travelling on such public highways, streets, lanes and bridges, nor in any way obstruct the entrance to any door or gateway, or interfere with the free access to any building:

(c.) The Company shall, before beginning any work within the limits of the Corporation hereunder and from time to time, as and when the system may be altered or extended, file with the Corporation a plan showing the public highways, streets, bridges or other public places in which it purposes to erect poles, string wires or cables, lay conduits and the particular part thereof it purposes to occupy for each such purpose, preference being given as far as possible to the use of lanes, side-streets or alleys, and shall at the same time present and file with the Corporation specifications of the electrical conductors, wires, poles and conduits proposed to be erected or laid by it, specifying the materials and dimensions thereof, the height of the wires, the depth of the conduits, the methods of insulation and the devices to be used for the protection of life and property, and the said poles, wires cables or conduits shall be erected, strung or laid as the case may be, in such places only as shall be agreed upon by the Corporation and not otherwise:

(d.) That the poles, wires and conduits hereafter to be erected in pursuance of such privilege shall not be used by the Company for any purpose other than for the purposes hereinbefore mentioned and the Company shall not permit or allow any other person, persons or corporation other than the said Corporation of the City of New Westminster to use or in any way utilize the said poles, wires, conduits and other structures to be placed on said streets in pursuance of this agreement for any purposes whatsoever without the consent of the Corporation by resolution of the Council first having been obtained:

(e.) The main transmission line of the Company, when carried through the City of New Westminster, shall be carried at a height not less than fifty feet above the ground and shall be carried along such location as may be approved by the Committee mentioned in sec. 4, s.-s. (b) hereof. The voltage to be carried on any wire forming part of the distribution system, and not being the main transmission line, shall not be greater than 2,500 volts, without the written consent of the said Committee:

(f.) The Company shall provide all insulators, safety devices and lightning arresters necessary for the proper insulation of their lines so as to render them safe to the public, such insulation or protection to be under the inspection and subject to the approval of the Committee mentioned in sub-section (b) of section 4 hereof:

(g.) Prior to the erection or repair of any poles by the Company which may render it necessary to dig into or in any manner interfere with any streets or lanes, or a portion thereof, the Company shall notify the Corporation of their intention to erect or repair as aforesaid, and shall obtain the consent, in writing, of the Committee mentioned in sub-section (b) of section 4 hereof, and the Company shall without delay, not in any case to exceed 72 hours, remove all earth, sand, debris, dirt or other material and put the street or land in as equally a good state of repair and condition as it was before it was broken or dug or disturbed:

(h.) The Company shall not cut down or mutilate any shade, fruit or ornamental trees:

(i.) The Company shall, whenever required so to do by the Corporation, place their wires under ground as may be directed by the Council, and subject to such conditions as may be then imposed by the Council, and remove the poles and wires erected and maintained hereunder, and in such event the Company shall have no claim for compensation, damage or otherwise in respect of such requirement, but this clause shall not be put into operation unless and until all companies, persons and corporations other than the said Corporation of the City of New Westminster conveying electric energy for light, heat, power or other electrical purposes shall be compelled or agree also to place their wires under ground.

(j.) Whenever it shall be necessary in grading any street or land of the said City, or in building any sidewalk or making any other improvement thereon, to move any pole or poles belonging to the Company, or on which any line or lines, wire or wires belonging to the Company shall be stretched or fastened, the Company shall, upon receiving forty-eight hours' notice from the Corporation's Engineer, contractor or other person having charge of such grading or other improvement, move such pole or poles; and if the Company upon such notice shall neglect or refuse to move such

pole or poles, then such pole or poles shall be moved by the Board of Works of the said Corporation at the expense of the Company, and the Corporation shall not be liable to the Company for any loss or inconvenience caused or occasioned by such removal.

(6.) The Company shall and will from time to time, and at all times, indemnify and save harmless the Corporation from any injury arising from any casualty or accident to person or property by reason of any neglect or omission to keep the poles and wires of the Company in a safe condition, and from all valid claims against the Corporation for damages caused by said wires or poles, or by any works, alterations, repairs or improvements in connection with the work herein contemplated.

(7.) The privilege hereby granted to the Company shall absolutely cease and determine after the expiration of three years from the date hereof, unless prior to the expiration of such term of three years the Company shall have so far completed their work as to be ready to commence delivering electrical energy and power within the City of New Westminster, B. C.

(8.) That nothing in this By-law contained shall be deemed to confer or be construed as conferring any exclusive right or powers on or to the said Company.

(9.) "Stave Lake Power Privileges By-law 1902" is hereby repealed.

(10.) This By-law may be cited as the "Stave Lake Power Privileges By-law, 1907."
